Class I, Division 1, Groups A, B, C, D; Class II, Division 1, Groups E, F, G; Class III; T6...T1

Class I, Zone 1, Groups IIC, IIB plus hydrogen, IIB; Zone 20; T6...T1

Overview

Description:

The RT14 direct mount RTD assembly is a resistance temperature detector designed for use in hazardous locations. The RT14 is a customizable product that is model number configured and made to order.

The RT14 consists of a stainless steel RTD sensor, complete with connection extension fittings that will spring load the sensor into a thermowell or a fixed fitting can be used without a thermowell. The RT14 is designed to be direct mounted to a temperature transmitter.

Features:

- Simple design that is used and accepted across multiple process industries.
- RT14 configuration options allow for many different arrangements to be configured for almost any temperature measurement application.

Application:

- Hazardous location temperature measurement
- Industrial temperature measurement
- Process control
- Outdoor / indoor use
